DIFFERENTIATORS

- Operational Expertise leveraging 30+ years of IT and Management experiences in the Federal market providing innovative and best value solutions to Clients
- Exceptional Customer Service with a focus on proactivity and building key relationships with customers and end users to deliver the right cost-effective solutions
- Our integrity and commitment to the mission success of our clients distinguishes us and is key to our successful continued relationships with our customers and partners
- Strategically using business acumen to create a network of Prime Contractors, Teaming Partnerships, Subcontractors, and other resource partners for full-service capability

PAST PERFORMANCE

- **FEMA Data Science Section (DSS) Integrated Support Team (IST):** AlleraIT Solutions is a subcontractor on the DSS IST contract providing Data Science, Solutions Engineering, Reports, Data Analytics, Agile, DevOps, and Program Management support services. Our team have been instrumental in helping FEMA respond to historic levels of disaster activity by delivering innovative decision support tools to support strategy and operations. Quote from FEMA: “Your team's ability to adapt to ever-changing circumstances and deliver exceptional service, often under intense pressure, has not gone unnoticed. Whether supporting analytics in disaster response efforts, developing and deploying first-rate statistical models and software applications, or offering innovative solutions to complex challenges, your team has consistently gone above and beyond in every task.” Because of our support efforts on the FEMA DSS IST:
 1. FEMA was able to secure funding and approval for an additional ~500 leadership and management positions to bolster its capabilities across all 10 FEMA Regional Offices.
 2. FEMA maintains a DHS-Accredited statistical model capable of predicting year-over-year staffing demands to guide strategic workforce management.
 3. FEMA operates a suite of decision support tools, co-developed by our staff, to inform workforce resourcing, budget management, and disaster staffing.
- **NIH Clinical Center Management Analyst Services:** AlleraIT Solutions is the Prime Contractor supporting Government Platforms, Business Process Improvement and Organizational Assessment, Communication, Program Planning and Management Services, System Integration, and SOPs - Development, Revisions and Implementation.

CAPABILITY STATEMENT

CORE COMPETENCIES

AGILE AND DEVSECOPS

Agile processes increase development speediness, reduce the time to deployment, improve quality and ingrain security throughout the development lifecycle. AlleraIT Solutions' certified professionals in SAFe, Scrum, and Kanban utilize Agile and DevSecOps processes to accelerate development and sustainment of enterprise systems. DevSecOps process integrates security practices with continuous integration and continuous deliver (CI/CD) with an aim to unite application development, IT operations, and security teams. Our programmers, release engineers and security team address the issues of code quality and reliability assurance in the development.

ANALYTICS

Data Analytics solutions leverage Big Data, Data Science Platforms and Enterprise Data Management to meet clients' requirements. AlleraIT Solutions offers end-to-end data analytic solutions to help clients strategize, architect, deploy, migrate and manage their Enterprise Data. Our Analytics solutions support: Big Data/Data Analytics, Data Science, and Data Management.

CLOUD

Cloud strategy and solution meet clients current and future requirements. AlleraIT Solutions subject matter experts work with clients to provide cloud strategy, planning, and development on the best solution for existing applications and future applications. We work with cloud providers to deliver on-premise, off-premise and hybrid solutions to meet our clients' needs in the areas of: Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS).

CYBERSECURITY

IT security services per the mission and needs of the Clients. AlleraIT Solutions consultants and security engineers provide a range of services to defend and protect the integrity of networks and programs: Strategy and Policy Design, Audit and Assessment, Penetration Testing, Governance, Computer Network Defense and Offense Services, Information Assurance, Risk Management and Compliance.

EMERGING TECHNOLOGIES

Investment in people and technology brings effective innovative solutions and services to improve client's mission. AlleraIT Solutions subject matter experts continually and deliberately reviews and remains aware of evolving industry best practices, technical and business studies, and adopts emerging technologies to address client needs. Our solutions include: Artificial Intelligence, Machine Learning, Big Data Platforms, and Automation.

PROGRAM / PROJECT MANAGEMENT

Experience to help Clients efficiently manage their IT Portfolio to achieve a shared strategic vision. AlleraIT Solutions supports our Clients with effective Program/Project Management from initiation to completion with specific attention to planning and executing while monitoring and controlling relevant systems. Our thought leaders work with Clients throughout the program lifecycle from developing strategic plans to demonstrating how information technology supports their mission. We are well experienced in the PMI Project Management Body of Knowledge (PMBOK®) and the Agile Methodology.
